SUMMARY

A highly accomplished Information Systems graduate, recognized with the **highest GPA** award in 2023, and possessing 2+ years of professional experience in Fullstack Software Development. Proven expertise in creating robust, scalable solutions using modern technologies. A dedicated and skilled developer with over 35+ national and international certifications in various technical domains, demonstrating a strong commitment to continuous learning and excellence. Adept at leveraging a comprehensive skill set to deliver innovative digital solutions, I am eager to contribute my abilities to dynamic teams and projects, driving impactful results.

EXPERIENCE

Project Manager 12/2024 - Current
PT Towuti Karya Abadi

- Developed FMS systems for mining operations using PHP Laravel
- Integrated real-time maps for asset tracking and fuel monitoring
- Built scalable backend APIs and responsive interfaces
- Collaborated with teams to translate operational needs into digital systems

Internship as Application Developer 09/2023 - 02/2024
PT Polyama Propindo

- Successfully migrated PT Polytama Propindo's outdated website to a modern platform, significantly improving functionality and user experience
- Worked on enhancing the performance and user interface of several websites within the company
- Collaborated with the Management Information System team to update and optimize digital platforms, improving overall business operations

Front End Engineer 08/2022 - 07/2023
PT Nusha Digital Solution

- Developed responsive web applications using Laravel framework for clients
- Designed and implemented front-end components using JavaScript, CSS, and Bootstrap, ensuring optimal user experience
- Integrated data from the backend using APIs, enhancing interactivity and data flow
- Participated in daily team meetings, collaborated on project planning, and executed tasks as per the team leader's requirements

Professional Placement as IT Officer 11/2019 - 01/2020
PT SUCOFINDO

- Created a website for storing and managing inventory data, streamlining operations
- Conducted inventory checks and recorded computer component details to maintain system accuracy
- Gained hands-on experience in website development and office IT management during the placement.

EDUCATION

Bachelor's Degree in Information Systems 09/2020 - 08/2024
Catur Insan Cendekia University

- Graduated with a GPA of 3.97 from the Faculty of Information Technology, specializing in Information Systems
- Developed a strong theoretical and practical foundation in information systems, equipping me to excel in various fields of technology and programming
- Demonstrated academic excellence through a commitment to learning, laying the groundwork for my future contributions to the tech industry

High School Diploma in Software Engineering 03/2017 - 03/2020
SMK Wahidin, Cirebon

- Focused on Software Engineering (Rekayasa Perangkat Lunak), gaining early exposure to development practices and IT fundamentals.
- Developed a solid understanding of software design, programming languages, and systems.
